

Alisa Katsionova

Product Designer | Frontend Developer | Technical Project Manager
alisakatsionova@gmail.com | linkedin.com/in/alisa-katsionova | github.com/AlisaK13003

SUMMARY

Creative, detail-oriented product builder who enjoys turning complex ideas into intuitive experiences. Known for taking ownership, bringing structure to cross-functional projects, and carrying work from early concepts through implementation and launch.

EXPERIENCE

UI/UX Lead, Project Manager & Partner

Jan. 2025 – Present

Innovation 4 Everyone, LLC (SaaS Startup)

- Lead product design, frontend architecture, and project priorities for MyLoops, a family-safety and emergency-coordination application, contributing to a 40% increase in early user engagement through launch
- Designed and tested 75+ mobile-first Figma wireframes and prototypes, using feedback to improve usability and accessibility
- Built a reusable responsive component system using React, Next.js, and Firebase, reducing frontend implementation time by approximately 75% while improving consistency and maintainability
- Co-developed a configurable live location-sharing feature for trusted contacts, reducing update delays by 25% in testing
- Established the product's Figma design system and created 30+ marketing graphics, product demonstrations, and app-store assets to improve developer handoffs and communicate product value

Software Engineer Intern

Jan. 2025 – May 2025

Simblocks.io

- Refactored core libraries and simulation modules from Windows-specific code into cross-platform CMake (development tool) projects, enabling reliable builds on Windows and Linux
- Built and automated the company's first Linux project setup and deployment workflow using shell scripts, allowing engineers to onboard and run the software in Linux environments
- Optimized CMake build configurations and linker settings, reducing compile times and redundant rebuilds by 60%
- Developed build-verification tests and environment-validation scripts, enabling identification of issues before staging deployment

Website & Microsoft Teams Intern

Jan. 2025 – May 2025

UCF Arboretum & Sustainability Initiatives

- Debugged and improved internal Microsoft Power Apps used within Teams. Implemented 10+ UX enhancements and automating approval workflows with Power Automate
- Designed interactive Figma prototypes, enabling decision-makers to interact with designs and solidify requirements
- Advocated for UCF Arboretum programs and resources at public events, directly engaging with 100+ visitors

Coding Instructor

Sep. 2023 – Apr. 2024

theCoderSchool

- Mentored 20+ students aged 6–17 in game development, emphasizing creativity, programming logic, and UI design
- Increased coding confidence through project-based instruction, hands-on exercises, and individualized coaching
- Provided weekly parent updates on student progress, milestones, strengths, and areas for improvement

Machine Learning Research Assistant

Jun. 2023 – Aug. 2023

USF Computer Science & Engineering

- Designed and executed benchmarking protocols using GAIVI, USF's GPU computing system, and Slurm, accelerating GPU-based algorithm evaluation by approximately 40%
- Analyzed AI success rate data utilizing Python and libraries such as TensorFlow, NumPy, and Pandas (AI and data-processing libraries) to automate experiments and visualization
- Tested machine-learning models against synthetic data-poisoning attacks and evaluated defenses to improve model robustness

PROJECTS

Project Manager & Lead Developer | *Sealbound*

Jan. 2026 – Present

- Lead a five-person cross-functional team in the development of a narrative-focused pixel-art RPG built in Godot
- Managed project scope, schedule, budget constraints, and resource priorities through Jira capacity planning, task tracking, status reporting, meeting agendas, and action-item follow-up
- Maintained documentation and cross-disciplinary handoffs for combat systems, NPC behavior, quests, and bonding mechanics

SKILLS

Product & Production: Microsoft Products, Jira, Confluence, Agile/Scrum, Sprint/Capacity Planning, Project Scoping, Production Documentation, Cross-Functional Coordination, Task Tracking, Status Reporting, Art/Development Handoffs

Programming & Development: Python, C++, C#, JavaScript, SQL, GDScript, React, Next.js, Firebase, Supabase, CMake, Git, Bitbucket, Linux, Godot Engine, Unity

Design & AI: Figma, Figma AI, Codex, Aseprite, Adobe Illustrator, Adobe XD, UI/UX Design, Game Design, Narrative Design

EDUCATION

University of Central Florida, Bachelor of Science in Computer Science

July 2026
